

JTAG SMT2™ Statement of Volatility

Created October 16, 2015 Author: JO
 Revised Feb 21, 2024 Author: JC
 This document applies to the JTAG SMT2 rev. D.X

This document lists the location, purpose, capacity, volatility and (re)programmability of memory devices that may be installed on the JTAG SMT2 (SKU: 410-251). The terms programmable and erasable refer to normal means of access available to the public. It does not include reverse-engineering or any other attempts to extract data from these devices.

The content of this document is provided for information purposes only.

Volatile Memory

The JTAG SMT2 does not contain any volatile memory.

Non-Volatile Memory

IC	Memory Purpose	Technology	User programmable	User removable	Size	Reset procedure
93LC56BT-I/OT	USB ID and Configuration	EEPROM	Yes	No	2 KiB	Available through support forum upon request
